In the Abstract:

Please replace the abstract with the following amended abstract:

The present invention discloses a use of N-acetyl-D-glucosamine in the manufacture of a medicament for treatment of urogenital tract infection. N-acetyl-D-glucosamine exhibits a function of suppressing the transplantation of exotic microorganisms and promoting the repair of topical skin tissue, and the formulation comprising it as a main active component is used for the prevention and treatment of urogenital tract infection and has advantages such as notable ~~therapeutical~~ therapeutic effect, easy preparation, non-irritation, non-contamination, etc.
